

# **HEALTHY VOLUNTEERS**

## **WANTED:**

**Males and Females**

**Age 40-60**

**Investigators from the Center for Advanced Heart Failure and Transplant at Hartford Hospital are conducting a study investigating the role of a circulating protein biomarker related to sodium levels in advanced heart failure. We are in need of age-matched healthy control volunteers willing to undergo a single blood draw.**

**To participate you must:**

- Be a healthy male or female between the ages of 40 and 60
- Not be pregnant
- Not be on a medical regimen

**The study requires:**

- One study visit involving a single blood draw.

**Participants will receive:**

- Financial compensation of \$20.

**For more information, please call: (860) 972-1212**
